

## How to determine the teams that advance to the final rounds?

- Total number of teams will be advanced: Six (6) to the semi-final round
- First four (4) teams will be decided using the following method:
  - a. One team with the most wins of each group (A or B or C or D) in the preliminary advance to the final round.
  - b. The 4 teams will be ranked 1-2-3-4 according to the number of wins.
    1. If the numbers of wins is the same, the team with **higher total score of the 2 games** wins.
    2. If the scores are the same, the team with **shorter Lagori pile time of the 2 games** wins.
    3. If the Lagori Pile time is the same, the team that **dropped all BOH more times in 2 games** wins.
    4. If they are also the same, the team with the **higher total score of Lagori pile of the 2 games** wins.
    5. If they are also the same, the winner is decided by judges.
- Two (2) other teams will be selected from remaining nine (9) teams using the above method in a. and b.
- Games in the final rounds
